

DFW INSTRUMENT CORPORATION

Test Equipment Repair & Calibration Services

DFW Instrument Corporation offers calibration services for a wide variety of Air Data and Pitot/Static Test Sets. We are fully equipped to cost effectively and precisely calibrate test equipment from Barfield, Druck (GE Sensing), Kollsman, Castleberry and others. Calibrations meet or exceed published specifications and are traceable to N.I.S.T. standards. DFW performs a complete teardown inspection including subassemblies and pumps. A system overhaul is performed and new assemblies are replaced as needed. Our laboratory currently provides quality instrument calibration and test equipment services to manufacturing, research & development, service, testing, and engineering organizations worldwide.

Customer Value Added Features:

- 3-5 day laboratory turn-around time.
- Pick-up and delivery services may be available in your area (please call for scheduling).
- 'Rush - Next-On-Bench' service available (please call to arrange immediate service).
- Computer generated Certificates of Calibration.

- **Calibration Services**
- **Repair/Overhaul Services**
- **Upgrade Sensors / Software**
- **Test Equipment Trade-Ins / Outright Purchase**

For more information and pricing please contact our Pitot/Static Repair Department at support@dfwinstruments.com or call us at 214 217-7600.
